# Human Machine Interface

## Swing Arm System

### Accessories

#### Base/ wall bracket, light, S1MWF

**Additional information:** The wall flange allows for fixed positioning on a horizontal or vertical surface when rotation is not needed. Die-cast aluminum construction. Includes installation instructions, gaskets, and tube setscrews. Surface mounting hardware is not provided.

**Note:** The maximum weight which a light swing arm can support depends on the length of the arm and the system structure. See diagram in the mounting instructions.

**Item no.**

S1MWF

#### Rotary base bracket, light, S1MTBB

**Additional information:** The rotatable base bracket allows the entire suspension system to rotate at the point of attachment on a horizontal surface. The arm can be rotated 300 degrees. Includes a safety stop and maintenance-free bearings. Die-cast aluminum construction. Includes installation instructions, gaskets, and tube setscrews. Surface mounting hardware is not provided.

**Note:** The maximum weight which a light swing arm can support depends on the length of the arm and the system structure. See diagram in the mounting instructions.

**Item no.**

S1MTBB

#### Set up joint, light, S1MSJ

**Additional information:** The set-up joint mounts the suspension system to a horizontal surface. The arm can be rotated 300 degrees. Includes a safety stop and maintenance-free bearings. Die-cast aluminum construction. Includes installation instructions, gaskets, and tube setscrews. Surface mounting hardware is not provided.

**Note:** The maximum weight which a light swing arm can support depends on the length of the arm and the system structure. See diagram in the mounting instructions.

**Item no.**

S1MSJ

## Rotation limiter (aluminum), S1MRL

**Additional information:** Rotation limiters are a retro-fit option to limit the rotation of couplings and joints which normally rotate 300 degrees. Each block limits rotation 30 degrees. Kit includes six rotation limiting blocks and installation instructions.

**Note:** The maximum weight which a light swing arm can support depends on the length of the arm and the system structure. See diagram in the mounting instructions.

Item no.
S1MRL

## Signal light adapter, round, S1MSLAR

**Additional information:** The signal light adapters are available in either round, elbow and reduction elbow cover versions and provide a means for attaching signal lights. Signal lights are not included. Aluminum caps are finished in RAL 9006 white aluminum powder paint. Includes caps, gasket, attachment hardware, and post.

**Note:** The maximum weight which a light swing arm can support depends on the length of the arm and the system structure. See diagram in the mounting instructions.

Item no.
S1MSLAR

## Signal light adapter, angled, S1MSLAA

**Additional information:** The signal light adapters are available in either round, elbow and reduction elbow cover versions and provide a means for attaching signal lights. Signal lights are not included. Aluminum caps are finished in RAL 9006 white aluminum powder paint. Includes caps, gasket, attachment hardware, and post.

**Note:** The maximum weight which a light swing arm can support depends on the length of the arm and the system structure. See diagram in the mounting instructions.

Item no.
S1MSLAA
